# Password Administration

## 1. List of all the attendee:

- Frodo Pano Martin
- Ezenwoke Uchechukwu Promise
- Faharetana Rakotomamonjy Andriatsiva
- Clementine Iradukunda
- Jose Pablo Arizandieta Morales
- Manuel Mario Zamalloa Llantoy
- Divine Oluyede
- Steve Daprim Amos

## 2. Project Overview:

The application of Password Administration Will help the people who often forget their password, with our app they can organize the different passwords they have in one place, they only need to remember a master password to Access the app.

The app targets a wide range of users, from individuals who need a secure place to store their personal passwords, to professionals managing multiple work-related accounts. It can be especially beneficial for users who use a variety of services like online banking, email, social media, and e-commerce platforms, and need a safe, organized way to store login details. What makes this app valuable is its ability to securely store sensitive information and generate strong passwords, offering peace of mind for those tired of trying to remember complex passwords.

## 3. Project Scope:

### In's:
- Login
- Authentication
- Text entries for the description, name of password
- Option to delete
- Option to edit
- Option to hide the password
- Option to create new entries

**Out's:**
- Option to share password
- Not for selling
- Not an SSO app

4. **App Features**:

- Users will have to create an account
- Users will need to authenticate login.
- Users will be able to add descriptions to their passwords
- Users will be able to Create new passwords
- Users will be able to Edit passwords
- Users will be able to Delete passwords
- Users will be able to Hide and show their passwords

- In a world where we need to have in mind a lot of information, it's easy to forget passwords, especially if we have many different passwords. We want to create a way to make their lives easier by giving them the chance to have their passwords save and secure at one specific place.

5. **Technical Considerations**:
- **Date Storage:** Creation time and last update.
- **Users Account:** Profiles and personal information.
- **Device Compatibility**: The application will be developed as a web app that is responsive, meaning it will work on mobile devices, tablets, and desktops.
- **Basic Security**: Encrypted passwords.
